Hours of Work: 15.2 hours, two days per week

Term of Contract: Twelve months maximum term contract, subject to funding

Reports to: Manager Primary Health Care Services (administration)
Senior Psychologist (clinical)

Historical Background

The Gunditjmara Nation starts at the South Australian border then goes to the foothills of the Grampians, to Pirron Yallock and Gellibrand; this covers the coastlines within these areas. There are many tribes within the Gunditjmara Nation. Each tribe had their own identity, which was knowing where their boundary lines were on country. These were often recognised by creeks, rivers and small hills.

Gunditjmara people established permanent settlements thousands of years ago, revealing a deep, enduring connection to the land. The Gunditjmara people used the land's natural topography and features to establish permanent settlements and villages along the lava flow near creeks and lakes.

Gunditjmara people gathered food including eels from the rivers and shellfish from the ocean. Places such as Lake Condah, Tower Hill, Budj Bim, Deen Maar and the Framlingham Mission areas all significant cultural sites for Gunditjmara people, that tells the story of our ancestor's way of life, culture and history.

Incorporated in 1982, Gunditjmara Aboriginal Cooperative is an Aboriginal Community Controlled Organisation (ACCO) that provides a range of holistic community health and

social support programs, principally to the Aboriginal community and other residents in Warrnambool and outlying areas. We work in close partnership with local government, other health service providers including other Aboriginal Community Controlled Organisations in the Western District of Victoria, liaising regularly on the provision of health service and social welfare and community support programs.

Overview of the Position

This clinical position responds to the needs of Aboriginal people who face significant disadvantage, (such as people who are homeless, people with a dual disability (co-occurring intellectual disability) and people with a dual diagnosis (co-occurring severe substance misuse problem). The role includes:

- Therapeutic work with individuals and groups presenting with a range of issues, using psychological theory and a research framework to modify behaviour and/or improve personal, social and vocational adjustment.
- Delivery of intervention services by integrating mental health within the social, emotional and cultural wellbeing of Aboriginal and Torres Strait Islander community. Brief intervention services enable a “no-wrong pathway” model of care.
- Provision of clinical interventions which focus on clients' life impairments resulting from high levels of psychological distress or illness, as it relates to each person's social and emotional wellbeing across the age spectrum.
- Provision of operational support and multidisciplinary integrated evidence based primary mental health service model of care.
- Working collaboratively with stakeholder partners through effective relationships, co-contribution service level agreements (as applicable) and referral arrangements between primary care, mental health, alcohol and other drugs, and other psychosocial services to facilitate clients access to the right service at the right time.

Key Responsibilities

1. Participate in a clinical mental health care team that integrates with non-clinical staff who provide wrap around services to clients.
2. Participate and conduct in multidisciplinary and clinical team meetings.
3. Maximise MBS billing in accordance to the provision of quality best practice client care.
4. Develop and implement individual treatment plans, specifying types, frequency, intensity and duration of therapy and discuss treatment plans with clients.
5. Assist to implement an integrated multidisciplinary model of mental health care within Gunditjmara working with clinical and non-clinical staff.
6. Evaluate the effectiveness of counselling or treatments, and the accuracy and completeness of diagnoses, and modify plans and diagnoses as necessary.
7. Assist clients gain insight and define goals to achieve effective personal, social, educational, and vocational development and adjustment.

8. Provision of mental health brief intervention services including:
 - Provide assessment and brief interventions for people experiencing life impairments associated with mental health difficulties, as it relates to their social and emotional wellbeing and consistent with best evidenced and contemporary mental health standards of assessment and treatment practices
 - Trauma informed assessment and screening for those most at risk to the onset or relapse of low prevalence complex and enduring mental illness
 - Delivery of culturally relevant trauma informed best evidence interventions for people that experience high to very high psychological distress and for those at risk of self-harm
 - Family based interventions
 - Timely access to a coordinated continuum of interdisciplinary care within a stepped care system
 - Referral pathways and access to specialist mental health services for people with low prevalence, complex and enduring mental illness
 - Referral pathways and access to appropriate treatment for mild to moderate mental illness within a stepped care system of primary care.

9. Delivery and treatment methods for mental health:
 - Provide assessment and brief interventions for people experiencing life impairments associated with mental health difficulties, as it relates to their social and emotional wellbeing and consistent with best evidenced and contemporary mental health standards of assessment and treatment practices
 - Deliver culturally appropriate trauma and treatment programs
 - Participate in culturally appropriate professional development training and supervision provided to support the provision of trauma and treatment programs
 - Develop a social and emotional well-being plan for each person assessed
 - Clinical services will be provided in a range of settings and through a range of mediums in consultation with clients and families to promote the safe engagement of each person and to influence constructive mental health and social behaviors
 - Appropriate psychometrics to be utilized in a timely manner
 - Counsel individuals and groups regarding issues such as stress, substance abuse, family situations, in order to modify behaviour and/or improve personal, social and vocational adjustment
 - Referral and receipt pathways will be developed in consultation with mainstream services to ensure timely access to specialist mental illness treatment services including, specialist crisis assessment and treatment services, psychological therapy services for mild to moderate mental illness, psychiatric disability and rehabilitation services, drug withdrawal services, rehabilitation services
 - Crisis intervention for distressed clients as relevant
